BUILDINGS OF DISTINCTION

as built by POPE & COTTLE

Foreword

FOR many years the Pope & Cottle Company have been designing and constructing all types of sectional buildings for the discriminating purchaser. A unique method of construction has been developed during these years to accomplish a definite object. That object was to provide a building of superlative quality—quality in construction, durability, design and appearance—and at the same time maintain a degree of portability which is so essential to easy and rapid assembling.

The photographs throughout this book will give an idea of the scope of the Pope & Cottle products. There is practically no limit to the possibilities of design, as plans are developed to meet the individual needs of the client—whether it be a rough hunting cabin, or an elaborate summer home. The ease and speed with which Pope & Cottle houses are delivered and erected is a factor which has contributed tremendously to their ever increasing success and popularity. Because of their unique construction, adapted to either winter or summer, they are to be found at the end of the vacation trail—at shore, mountain, or lake, as well as on some of the finest estates where they are used for studios, guest houses, etc.

Shipped in completed, painted sections, with windows and doors in place, hardware attached, and finished to the last detail, Pope & Cottle houses are so easily set up that skilled labor is not necessarily required to erect them. Where desired, however, the Company will send an experienced foreman, at a nominal charge, to superintend and help with the erection. An interesting feature of the Pope & Cottle house is that it may be added to at any future time without damage to any of the original sections.

Copies of letters scattered throughout the catalog tell of the merits of Pope & Cottle houses in an interesting and convincing manner. Read what others have said about our buildings.

TEN-POINT FEATURES

The following ten-point features are distinctive with Pope & Cottle houses and will be of interest to the purchaser with a practical turn of mind who wishes to know *why* the Pope & Cottle method of sectional construction is the best. Ever alert for improvements, this Company has developed two or three features this year which heretofore have been considered impossible with this type of construction. They are included in the diagram of the Ten-Point Features shown on page five.

1. Roofs are shipped in sections with 24-inch creosote stained cedar shingles attached and so ingeniously devised that no joints will show. No nail heads are exposed. All roofs are stained green. Where a fire-resisting roof is required by local building laws, or at the option of the client, Asphalt Shingles are furnished in bundles to be applied to the roof sections at the time of erection.

2. Special Pope & Cottle Air Cell Insulating Board is used between outside walls and studding. This material is applied on all houses, whether for summer or winter use, and provides a neat interior finish as well as an adequate insulator. It is absolutely waterproof.

3. Thoroughly seasoned Redwood or Cedar siding, free from knots, is used for side walls. Narrow or wide siding is optional. Wide siding gives a pleasing Colonial effect. Outside walls are painted three coats of first quality white paint. Shingles may be substituted in place of siding at an additional cost.

4. Standard windows are double hung, with cords and weights. Windows are in the sections when shipped and are glazed and complete with necessary hardware.

5. All corner studs are double.

6. All corners are rigidly braced as shown in sketch of our Ten-Point Features.

7. Casement windows, to open out, may be substituted for standard sash windows. These are glazed and provided with all necessary hardware. Where casement windows are

used, window screens may be attached inside, and are swung on hinges at the side of the window frame, opening in.

8. Where a Celotex lined building is desired, this material is placed under the floors (see diagram) and on the roof or ceiling, on the side walls inside the studs, and on both sides of partitions, in addition to the Pope & Cottle Air Cell Insulating Board. This provides a finished interior, with adequate insulation. The air space between these two insulating materials is still further protection against heat and cold. Celotex in its natural finish is neutral in color and lends itself well to any decoration. Interior trim covering celotex joinings is stained a soft gray or walnut.

9. Floor sections are covered with kiln dried tongued and grooved vertical grain flooring, shellaced and varnished.

10. The double wall plate adds rigidity and compares favorably with any standard construction.

SERVICE

The work of Pope & Cottle Company does not stop when the house has been built as skillfully as craftsmen can perform their respective duties. There is a service that starts with the desire to help you plan a house that shall be individually your very own, and stops only when our work is completed to the client's satisfaction. It even extends further than this—it includes the complete furnishing of your cottage by our interior decorating department, which is described later on page 28.

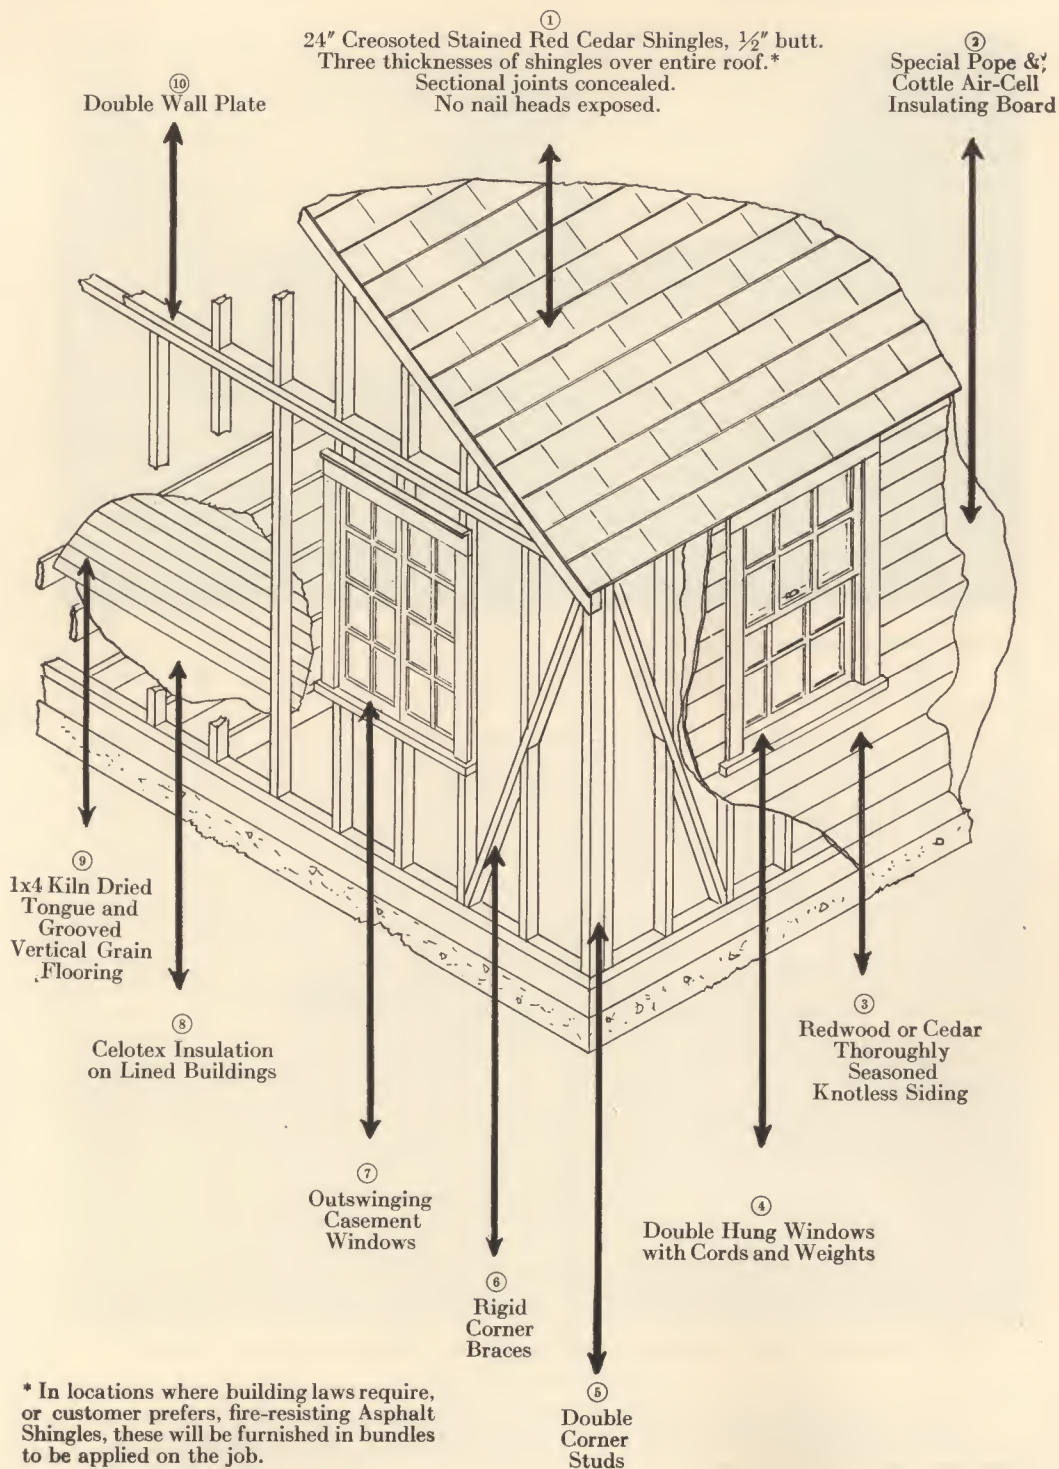

CONCLUSION

In concluding, Pope & Cottle Company have endeavored to show a few of the many features of their distinctive designs and the method of construction embodied in their buildings. They feel sure that the photographs that follow, together with a few of the many letters they have received, will suffice to enlist you—*a satisfied customer.*

TERMS

A twenty-five per cent deposit is required with all orders. The balance may be paid by sight draft attached to bill of lading, or after the material is received, providing satisfactory credit references have been furnished.

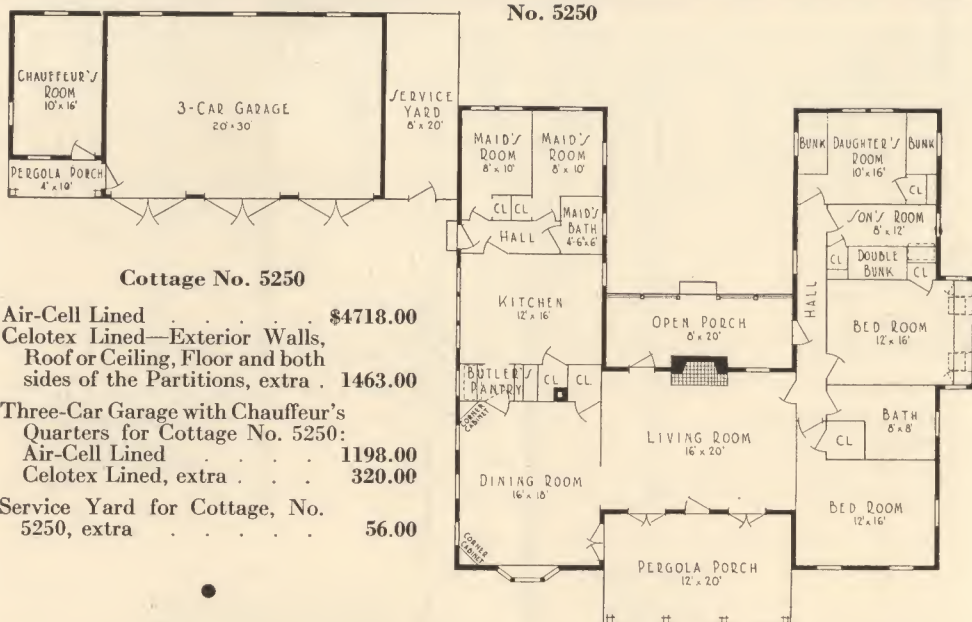

10-POINT FEATURES OF POPE & COTTLE CONSTRUCTION

COTTAGES and BUNGALOWS

No. 5250

This cottage typifies the design and construction of Pope & Cottle Company buildings. Every possible convenience and accommodation has been provided.

No detail has been overlooked to make this building absolutely without competition at the price.

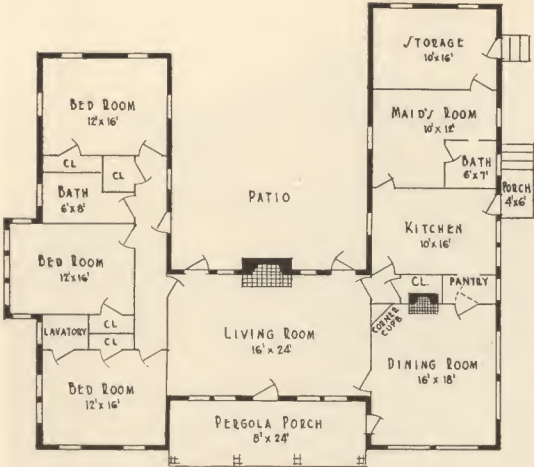

BUILDINGS OF DISTINCTION AS BUILT BY POPE & COTTLE

POPE & COTTLE COMPANY
 Revere, Mass.

Gentlemen: You built a small cottage and garage for me at Wianno, Cape Cod, and I am very much satisfied with them and with the promptness and exactness with which you fulfilled all specifications.

Yours very truly,

MRS. EDWARD EVERETT BLODGETT,
 1180 Beacon Street, Brookline, Mass.

The unique Pope & Cottle "H" design is shown in this cottage. This type provides an extraordinary amount of window space. Such space assures a maximum of desirable sun, light and ventilation.

POPE & COTTLE COMPANY
 Revere, Mass.

Dear Sirs: I am pleased to say that the building which you erected for me has been satisfactory in every respect. I greatly appreciated the courtesy of your workman who tried in many ways to add little accessories to the building. The building itself is well arranged, neat in appearance and well put together. I might add that among my friends it has caused considerable favorable comment and I should not hesitate to recommend a similar one to any of them. Very truly yours

WALTER F. NOLEN, M.D.,
 Marlborough Street, Boston, Mass.

This comfortable looking year-round home is built upon a permanent concrete foundation to comply with city building laws. Pope & Cottle houses will pass the most exacting requirements.

sides of the Partitions, extra . . . 380.00

For those who wish something distinctly different, this studio cottage offers a rare opportunity. The studio itself is large and roomy—eight feet at the eaves and eighteen feet high at the peak—lighted on the gable end by three unusually large windows. The wing contains two comfortable bedrooms with bath and five roomy closets. Kitchen and pantry are directly behind the studio and meals may be served either in the studio or the attractive dinette provided in one corner.

Pope & Cottle Company welcomes the opportunity to estimate on special buildings of any type.

BUILT FOR PERMANENCY

Furnishings and Interior Decorating Department

•

When you are considering the furnishings and decorations for your new home, consult the Furnishings and Interior Decorating Department of Pope & Cottle Company, who are amply qualified to consult with you and furnish your every requirement.

A competent interior decorator is retained by us for this purpose, and he will give you the benefit of his advice and experience in the selection of a single piece of furniture, the design of a particular piece of wall paper, or the complete furnishing of an entire house, even to such details as silverware, dishes, kitchenware, draperies, linens and rugs.

The most satisfactory and lasting results will be obtained only when complete understanding of the particular decorating problem is assured by our client and ourselves, and when sympathetic consideration is given to the proper expression of our client's personality.

We welcome the opportunity to demonstrate our ability to serve you in this field and without obligating you in any way will gladly advise or render estimates on any plans you may have in prospect. We will send you, on request, an estimate for the *complete* furnishings and decorations for any of our house designs.

A cordial invitation is extended to you to visit our very interesting exhibit on the Revere Beach Parkway where complete interiors are arranged in the early American and Colonial manner.

This is an example of Pope & Cottle service for furnishing one or more rooms complete—

PLAYHOUSES

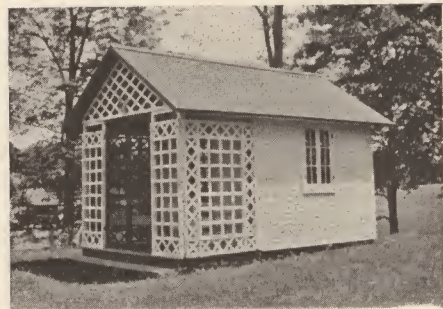

Playhouse No. 610—6x10 ft. Price \$150.00

On many estates, large and small, Pope & Cottle Playhouses are bringing keen constructive pleasure to children. Our playhouses are not toys, but carefully designed and accurately constructed small buildings of the highest quality. In addition to the joy of possession the children readily learn the rudiments of housekeeping and house management in these miniature homes—their educational value is inestimable. These Playhouses are painted white with a green roof—the interior a gray or brown stain with shellaced floors.

POPE & COTTLE COMPANY
Revere, Mass.

Gentlemen: The playhouse which you sold me has been a tremendous success. The children get great pleasure and sound training in housekeeping from this which they consider a toy. On the other hand, it has stood up as no toy can and represents a sound piece of work and an attractive addition to my place.

Very truly yours,
FRANCIS I. AMORY,
Spencer Trask & Company,
Boston, Mass.

GREENHOUSES

No. 1

Pope & Cottle Greenhouses are made of clear heart California Redwood—impervious to rot and peculiarly suited to greenhouse conditions. The interior and exterior are completely painted. Prices include two plant benches the full length of the greenhouses and a work-bench in the heater room together with a slatted board walk to be placed over the dirt floor.

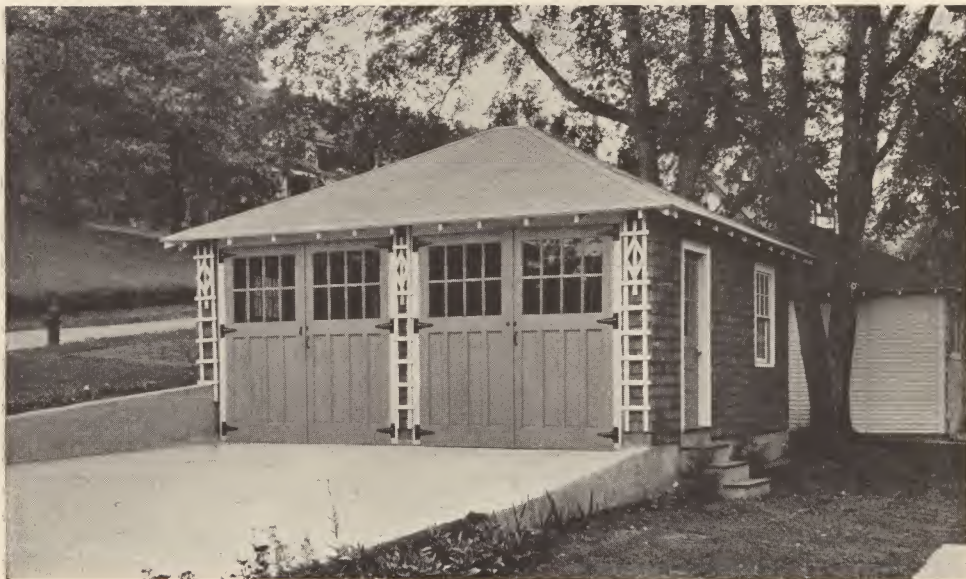

Additional features of Pope & Cottle Greenhouses: 5-foot sidewalls—includes 2 feet 6 inches of siding and 2 feet 6 inches of glass. Continuous roof bars from eaves to ridge insure rigidity. Practical ventilation in walls and roof. Ample light is provided in the heater room where potting is done. We quote prices on the glass but recommend that it be obtained from local sources as we cannot guarantee against breakage in shipping.

	Extra for glass	60.00
	Complete heating system with all piping cut to fit and metal chimney included .	170.00

ALL BUILDINGS ATTRACTIVELY PAINTED

GARAGES

Pope & Cottle Garages are manufactured entirely of wood because experience has shown that all wood construction is the dryest, easiest to heat, and most generally satisfactory.

Pope & Cottle garage construction is of the same unsurpassed quality as characterizes other Pope & Cottle buildings. The various garage designs are so arranged as to harmonize with any type of architecture. If shingles are desired instead of siding, the additional charge will be given upon request.

Note: Garages are lined with our special Pope & Cottle Air-Cell Insulating Board.

BUILDINGS OF DISTINCTION AS BUILT BY POPE & COTTLE

PRICE LIST ON GARAGES

One Car		Two Car	
12 x 18 ft.	\$300.00	18 x 18 ft.	\$390.00
12 x 20 ft.	330.00	18 x 20 ft.	440.00

		20 x 20 ft.	475.00

For Circle Top Windows in Two-Car Garages, add \$40.00.

Floors are not furnished with Garages.

We recommend placing concrete floor after garage has been erected.

POPE & COTTLE COMPANY
Revere Beach Parkway, Revere, Mass.

Gentlemen: Some four years ago you built a four-car garage for me with chauffeur's room, and same is most satisfactory. As far as I can see, I am sure I could not have done as well anywhere else in regard to quality.

Very truly yours,

GIFFORD K. SIMONDS,
89 Broad Street, Boston, Mass.

POPE & COTTLE COMPANY
Revere, Mass.

Gentlemen: The sectional log cabin purchased from you last spring and erected on the Brooks Estate, Winchester, to serve as a scout house for Winchester Girl Scouts, is a source of great pleasure to the girls and their leaders. It answers our purposes splendidly and fits into its woodsy surrounding perfectly.

Yours very truly,

MRS. PRESTON E. COREY,
Winchester, Mass.

BUILT-IN AIR-CELL INSULATION

CABANAS

Cabana No. 4216—16 x 42 ft.—Price \$1272.00

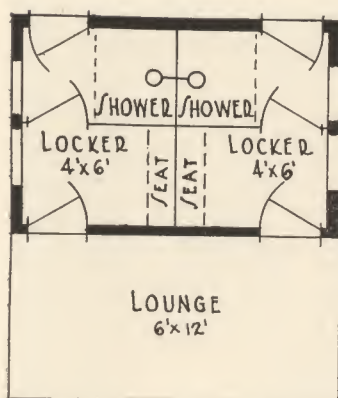

If you have a swimming pool or if your property borders on a lake or the sea-shore, a Pope & Cottle Cabana will add greatly to the pleasure of bathing and entertaining. The Pergola Lounge, private lockers and shower baths make an arrangement which affords luxury and comfort.

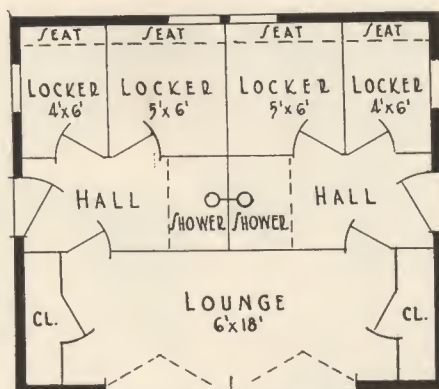

BUILDINGS OF DISTINCTION AS BUILT BY POPE & COTTLE

No. 1816

Cabana No. 128—12x14 ft.
Price \$390.00

Cabana No. 1816—16x18 ft.
Price \$842.00

All locker rooms in our Cabanas have outside light and ventilation. Exteriors are completely painted white—roofs green. Interiors stained silver gray or brown. The floors are protected with spar varnish—platform floors are painted gray. Cabanas are also lined with Pope & Cottle Air-Cell Insulating Board.

ARCHITECTURALLY CORRECT

Poultry Houses and Dog Kennels

8' x 8' Shelter Front House for 20 Hens

Kennel No. 1

Great care has been exercised in the design and manufacture of Pope & Cottle Kennels. We have provided ample protection from the weather by the use of a hood, in preference to a door, which in our opinion, is not only useless but dangerous. A dog requires just two things, a dry kennel and protection from draft. Kennels are painted white with green roof and are shipped knocked down, carefully packed in cartons.

No. 1 26 x 38 in. \$17.50 No. 2 31 x 49 in. \$20.00

The "Shelter Front" feature of the Pope & Cottle Poultry House keeps out driving rain yet allows constant ventilation. Our windows are designed to allow the maximum ventilation without drafts.

The interior is fitted with nests, roosts and dropping boards. All openings are protected with one-inch mesh galvanized netting.

The exterior is painted white with green trim.

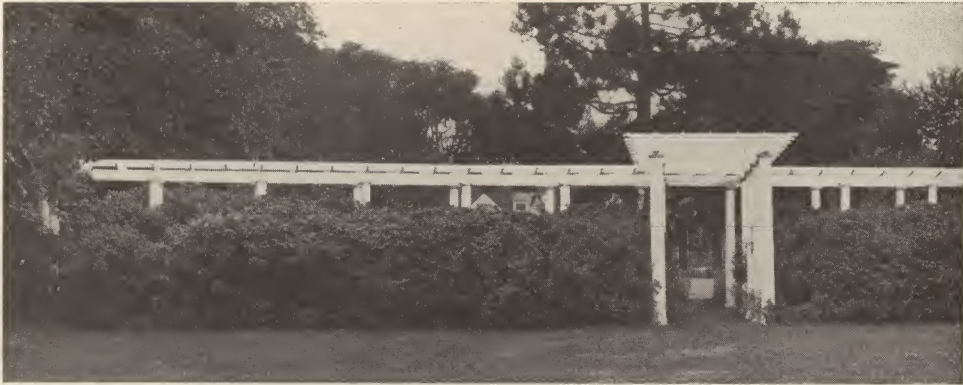

8 x 8 ft. House (1 pen)	\$110.00
8 x 16 ft. House (2 pens)	185.00
8 x 24 ft. House (3 pens)	260.00
10 x 12 ft. House (1 pen)	185.00
12 x 20 ft. House (2 pens)	270.00
12 x 30 ft. House (3 pens)	355.00

For wooden floors add 25 cents per square foot.

BUILDINGS OF DISTINCTION AS BUILT BY POPE & COTTLE

PERGOLAS

PERGOLAS

6 ft. wide—any length—per lineal foot \$5.00

8 ft. wide—any length—per lineal foot 6.00

Our pergolas are completely painted white.

Pope & Cottle Garden Furniture which embraces a complete line of fences, arbors, trellises and window boxes, is noted for its exquisite design and superior workmanship. Only seasoned Oregon pine, spruce and cedar are used. Each article is skillfully assembled by craftsmen who specialize in this work. You will be delighted with the design and finish of all of our garden furniture.

Comes in sections 8 ft. 3 in.
long

4-Bar, per section	. \$2.65
5-Bar, per section	. 2.85

"Dubois" is the nationally known trade-mark of the original French woven wood fence. Every section of "Dubois" Fence is branded for the purchaser's protection and assures uniform quality and long wear. It is made in France, by hand, of *live-cut* split chestnut saplings that are specially heat-treated to prevent warping. Its beautiful appearance is too well known to need further description.

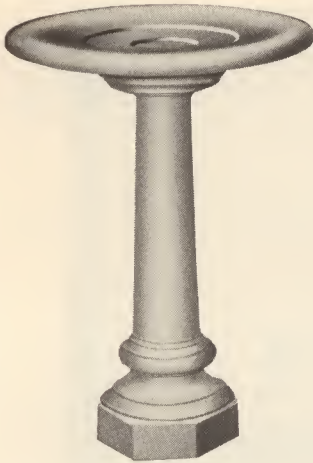

We illustrate and price two of the "Dubois" Fences, the woven wood fence and the hurdle fence. The cleft fence is similar to the woven wood fence but the spacing between saplings is greater. Prices sent upon request.

ARTCRETE PRODUCTS

"Artcrete" is a cast stone preparation peculiarly suited for garden furniture. It is composed of natural stone and cement, properly seasoned, carefully finished and scientifically treated to expose to view the natural stone which it contains throughout. It is not surfaced and resists age and weather like natural stone at much less cost.

Bench No. 2418
height 16 in., width 15 in.,
length 54 in.
Price \$25.00

Bird Bath No. 6325
height 31½ in., width 24 in.

PYROFAX GAS

A City Convenience for the Country Home

Many people to whom a vacation means freedom from care and worry have thanked us for calling Pyrofax Gas to their attention.

Pyrofax is clean, pure gas taken from natural gas fields highly refined and purified. It comes to you compressed into steel cylinders, two cylinders in an attractive cabinet, one for immediate use, the other a reserve. As one cylinder is exhausted, the other is turned on and the empty one replaced.

You can have confidence in Pyrofax because it is made by the oldest and largest compressed gas manufacturers in the world and because its users are serviced by a nation-wide chain of distributing stations—even in the most isolated sections of the country.

And it is *economical*. Complete installation including a beautiful console style range, and one year's maintenance on leased equipment as low as \$99.50.

Sunbeam Cabinet Heaters

A Warm-Air Heater that
circulates fresh, moist air
throughout the house—yet
requires no basement.

Price \$59.00

Heater is made in two
finishes—brown and green.
